**PROJECTS**

---

**Camera AI – Dynamic Software**  *, Backend Dev* 07/2026 – 07/2026

- Developed a dynamic, on-premise AI vision platform for industrial visual inspection using NextJS for the frontend and FastAPI (Python) for the backend.
- Integrated YOLOv8 and MobileSAM models for real-time object detection and segmentation, replacing legacy hardcoded systems with a user-configurable platform.
- Architected role-based workflows (Admin & Inspector) to streamline model training, dataset management, and real-time production monitoring.
- Implemented external hardware integrations (System Webhook, MQTT Broker) to trigger automated alerts for defective items (NG) during live inspections.

**Design Anything**, *Backend Dev* 09/2025 – 03/2026

- Design Anything its a platform for editing photo with AI feature with image processing like delete background, change style images, and change background image.
- As backend dev at this project I am responsible to connecting HORDE API to applied image image change style and image generate feature on this website that i build
- (<https://github.com/darrellrafa/DesignEverything>)

**Nutribot**, *AI-Powered Nutrition Assistant with Local LLM Integration* 02/2026 – 02/2026

Developed a production-grade full-stack AI application that combines Next.js (TypeScript) frontend with Flask (Python) backend, featuring intelligent meal planning, personalized nutrition tracking, and AI-powered dietary guidance.

**Technical Highlights:**

- **Dual Local LLM Architecture:** Integrated Ollama for on-device inference using Llama 3.2:3B (primary chat model) and fine-tuned Qwen 2.5:7B-Instruct (Q5 quantized for summarization), eliminating cloud dependency
- **RAG Implementation:** Built retrieval-augmented generation pipeline with sentence-transformers and ChromaDB for context-aware responses augmented by food nutrition database
- **Model Optimization:** Applied quantization techniques (Q4/Q5) and prompt engineering to balance performance and quality
- **Advanced Features:** Bilingual NLP support, personalized meal plan generation, automated summarization, meal calendar extraction, and nutritional calculations (BMR, TDEE, macro tracking)

- **Resilient Design:** Implemented Gemini API fallback mechanism and comprehensive error handling for production reliability
- **DevOps:** Created automated cross-platform model setup scripts, environment configuration management, and performance evaluation framework comparing model efficiency

(<https://github.com/darrellrafa/Nutribot>)

### **Meet & Fight, Full Stack Dev**

11/2025 – 12/2025

- Meet & Fight is a platform like tinder but not for finding a life partner but for finding a sparring partner, the purpose of creating this application is to support the martial arts sector.
- As a Full Stack Dev I am responsible for building mobile applications using flutter and connecting the database using appwrite (<http://meetandfight.vercel.app/>)

### **E-Learning Platform, TypeScript, Next.js, React, TailwindCSS Interactive educational application for elementary students**

- Designed and developed a gamified e-learning application with progressive node-based module progression system, ensuring structured learning paths where students unlock content sequentially upon completion
- Implemented child-friendly onboarding experience featuring interactive SVG assets, diagnostic assessments, and learning preference selection to enhance user engagement
- Built dynamic dashboard interface with theme customization (Volcano/Magma theme) with glassmorphic UI elements and micro-animations using TailwindCSS
- Developed interactive tutorial system and adaptive scoring mechanism with student avatars and real-time performance tracking
- Integrated Appwrite backend for user authentication, database management, and secure data persistence
- Deployed to production on Vercel with responsive design optimized for diverse screen sizes

**Tech Stack:** Next.js 16 (App Router), React 19, TypeScript, TailwindCSS 4, Appwrite, Groq SDK

## CERTIFICATES

---

### **MikroTik Certified Routing Engineer**

Issuer: MikroTik

### **HTML**

Issuer: SoloLearn

### **Programming and Software Development - Web Developer**

Issuer: Badan Nasional Sertifikasi Profesi (BNSP)

Credential ID: J.1389.01671.2025

### **Machine Learning for Beginner**

Issuer: Dicoding

### **Fundamental Pemrosesan Data**

Issuer: Dicoding

### **Data Fundamentals**

Issuer: IBM SkillsBuild

### **Belajar Dasar Cloud dan Gen AI di AWS**

Issuer: Dicoding

### **MikroTik Certified Network Associate**

Issuer: MikroTik

### **AI Basic Learning**

Issuer: Dicoding

### **Prompt Engineering for Software Developer**

Issuer: Dicoding

### **Penerapan Data Science Dengan Microsoft Fabric**
